Better Key Control in One Simple Solution

Secure, manage, and track keys with the KeyTracer KTA Series key control system using RFID technology – the most reliable key tracking system available.

- ✓ High security locking system
- ✓ Modular and expandable design
- ✓ Feature-rich key management software
- ✓ Real-time reports and alerts
- ✓ Built-in fleet management tools
- ✓ 100% accurate RFID technology
- ✓ Lifetime guarantee on key fobs

Key Management Solutions for:

- Law Enforcement
- Correctional Facilities
- Warehousing & Distribution
- Utilities & Energy Sector
- Manufacturing Facilities
- Government & Military
- Critical Infrastructure
- Cities & Municipalities
- Hotels & Hospitality
- Casinos
- Educational Institutions
- Fleet and Transportation

High Security Locking Key Cabinets

All keys are individually locked in durable 16-gauge metal cabinets.

- Users can only take keys that are assigned to them.
- Keys can be assigned to an individual, or by role or department.
- Authentication methods include: PIN, Prox card, biometric (fingerprint or facial recognition), or smartphone.
- Keys access can be set to require authentication of one or more authorized users
- Key curfews can be set to limit access to specific keys or only during custom schedules.
- Receive real time alerts and notifications by email or SMS.

Superior Key Control Is Here

The KeyTracer KTA Series offers complete key management in one smart, scalable solution.

- Gain complete control over keys in your facility.
- Improve efficiency of key transactions
- Control access to buildings, vehicles, valuables, and more.
- Stop unauthorized access to keys.
- Prevent key loss and costly rekeying.
- Eliminate time-consuming regulatory logging.
- Seamlessly integrate key control with your security infrastructure.
- Manage all key access and reporting with the powerful RTNHub Enterprise Software.

Smarter Key Fob Design

Sturdy KeyTracer key fobs are perfect for any environment. They are corrosion resistant, fire resistant, tamper-proof, and waterproof. They are reusable, virtually maintenance-free, and come with a lifetime warranty.

KeyTracer key fobs use embedded RFID technology. Simply hold the key fob near the control terminal to initiate a return. The correct key slot instantly lights up. Key fobs and slots have a sturdy cylindrical design able to hold even your heaviest key ring. They can be inserted in any direction into lock slots making every key return a one-step, error-free transaction.

Powered by Reliable RFID Key Fob Technology

- Corrosion resistant, fire resistant, tamper-proof, and waterproof.
- Reusable, virtually maintenance-free key fobs come with a lifetime warranty.
- Fast, contactless communication.
- Suitable for high-security environments, does not conflict with radios, WiFi, or other mission critical wireless signals.
- 100% accurate transactions
- No key ring labeling required; illuminated key slots show users where keys belong.

KeyTracer Control Terminals

KeyTracer KTA Series comes with one of two different control terminals to choose from:

- KTA Terminal with an illuminated keypad.
- KTA Touch with touchscreen.

Both use an intuitive menu system that makes key transactions simple.

Available authentication methods:

- Proximity card (compatible with major access card systems)
- RFID fob
- PIN code
- Biometric (fingerprint, facial or palm)

The terminals can be networked to your KeyTracer installation or can function standalone. They have intelligent power management features and only turn on when needed. Terminal fix height is adjustable to comply with disability requirements.

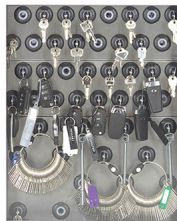

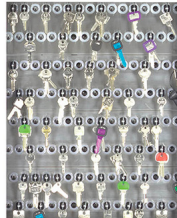

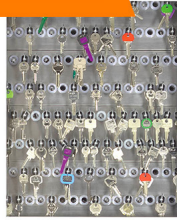

KeyTracer KTA Series Cabinets

Flexible Design, Reliable Performance

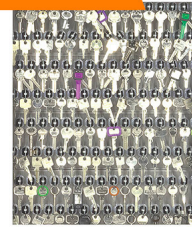

KTA Series Key Cabinets

The KTA Series has five different cabinet sizes able to hold anywhere from 8 to 384 key rings per cabinet depending on the modular key panel modules selected.

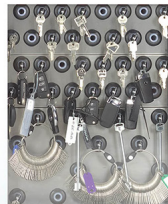

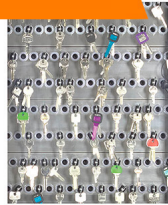

KTA-12

KTA-4

KTA-8

KTA-1

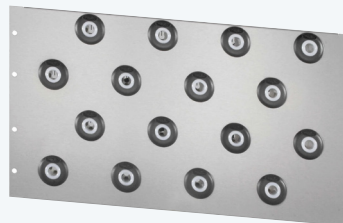

KTA-2

Key Panel Modules

A variety of key panel modules are available for KTA Series cabinets. Individual Key panel modules can hold between 8 and 32 key rings. Blank key panel modules are also available to accommodate expansion or to allow extra hanging space for longer larger keys.

16 Wide Key

Up to 16 key rings, with support for long sets

8 Card

Up to eight master key cards, temporary access cards, or credit cards

8 Key

Up to eight key rings, with support for long sets of keys

16 Key

Up to 16 key rings, better for larger sets

32 Key

Up to 32 key rings, better for smaller sets

RTNCommander Software

The RTNCommander key management software gives you all the information collected from your KeyTracer system in one intuitive interface. You can make rapid updates and respond to customized alerts on desktop computers and/or mobile devices.

Stay informed with data collected in real-time about keys in use in your facility. Your team can rapidly provision new users and modify access rights. Authorized personnel can trigger emergency key releases right from the RTNCommander application.

RTNCommander software can scale from managing a single key cabinet to multiple units across a multi-site organization. Its browser-based interface supports robust role-based access control for all your users and administrators.

Integrations via RTNConnect

RTNConnect is a proprietary middleware API that makes it easy for KeyTracer cabinets to integrate with any Access Control solution System, such as Genetec, Lenel, Microsoft Active Directory, Brivo, AMAG Symmetry, C-Cure, and many others. That means your users will experience no workflow disruptions with a KeyTracer solution.

RTNConnect also makes it easy to integrate with ticketing and customer support platforms, like Zendesk and ServiceNOW, so any damage reported by KeyTracer users can automatically open a service ticket. Your organization saves time and resources by automating and streamlining manual processes.

KeyTracer integrates seamlessly with AssetTracer Smart Lockers.

RTNCommander Software Add-Ons

Make your KeyTracer even better
with available software add-ons.

KeyTracer's KTA Add-On

- Set key sign-out limits and automatically monitor user activity
- Receive email alerts whenever users exceed set limits
- Notify users and supervisors when drivers licenses near expiration
- Automatically revoke key access if licenses expire
- Extended reporting: audit key fob access, active user status, and other items
- Export reports as PDF, XLS, CSV, or XML files

Fleet Management Add-On

- Create and review vehicle reservations right from your smartphone or desktop
- Disable fleet key access for users with expired licenses or other unauthorized users
- Automate time-consuming fleet record keeping
- Set or review mileage and damage logging requirements
- Receive alerts on desktops or smartphones when a vehicle key is not returned

Vehicle Reservation Add-On

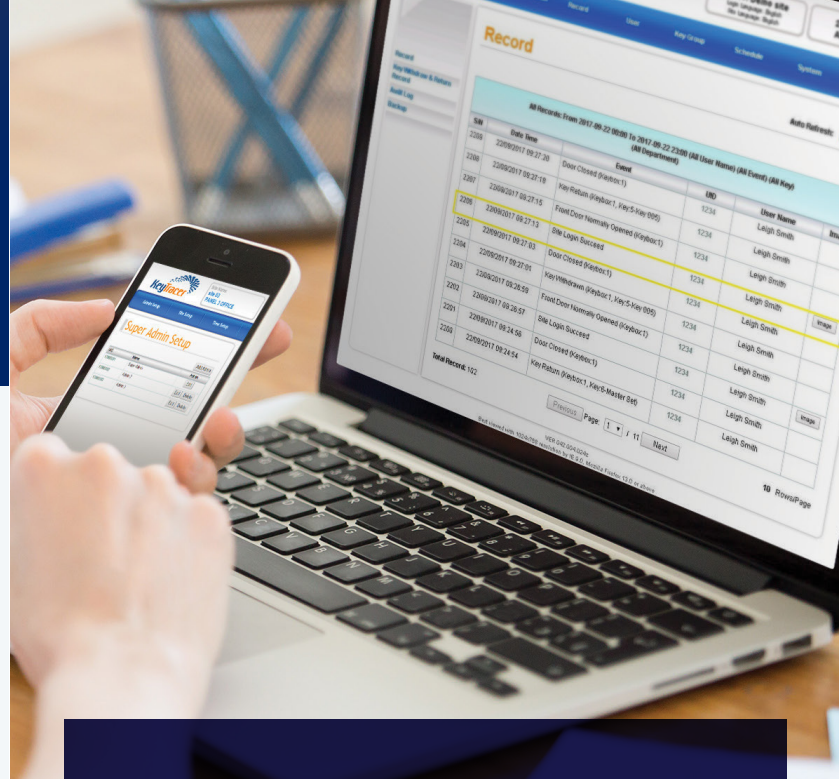

- Securely reserve vehicle keys from anywhere using a mobile web app
- View key reservations in a daily, weekly, or monthly calendar
- Automatically notify staff via email or text when vehicles become unavailable

High Security Add-On

- Dual Authentication: Keys are removable only when two (or more) users authenticate
- Create key curfews or schedules for specific key fob and user pairs for when specific keys can be taken
- Manage system alarms with option of sending emails based on any defined alarm

Key Assignment Add-On

- Rapidly enable one-time key fob access, once the key is returned the assigned user no longer has access
- Lock key fob assignments to specific users, those fobs cannot be authorized by any other system user

Comprehensive Reports

Reports are highly customizable for any organizational or regulatory need. Standard reports can be generated by date range, keys taken or returned, by specific user or group, and much more.

Custom reports can be generated using any field available in the database, including:

- Specific date ranges
- Current key fob holders
- Specific key fobs
- All events today, this week, or month
- Real-time transaction histories
- All not-cleared faults or alarms

Reports can be delivered via email or SMS in real time based on triggers you set, like a late key return, or on a schedule you specify. Additional specialized reports are available from a software add-on that can show you inconsistent returns by key fob or user, as well as alarm histories.

Real Time Networks

KeyTracer is a premier brand of Real Time Networks (RTN).

Over 2,000 of our key and asset management solutions are in use worldwide. With operations in the United States, Canada, and select countries around the world, Real Time Networks (RTN) is a leading provider of custom safety and security solutions.

For over 20 years, RTN has built a reputation for delivering custom security solutions backed by industry-leading customer service and support.

Technical Specifications

Dimensions (WxHxD/Weight)

KTA-1 CABINET	KTA-2 CABINET
630 x 299 x 210 mm / 15 kg 24.8" x 11.8" x 8.3" / 33 lb	630 x 432 x 210 mm / 20 kg 24.8" x 17" x 8.3" / 44 lb
KTA-4 CABINET	KTA-8 CABINET
630 x 666 x 210 mm / 26 kg 24.8" x 26.2" x 8.3" / 57.3 lb	630 x 1252 x 210 mm / 60 kg 24.8" x 49.3" x 8.3" / 132.3 lb
KTA-12 CABINET	
630 x 1920 x 210 mm / 70 kg 24.8" x 75.6" x 8.3" / 154.3 lb	

Material

- 16-gauge powder-coated steel
- 1.5mm (0.06") thick housing
- 2.5mm (0.10") thick lock door, window optional

Power

- 120V power through outlet or hard wired
- Full battery back-up

Environment

- 5° to 50°C (40° to 120°F) operating temperature
- Operational 5-95% non-condensing relative humidity

Technical

- 125 kHz RFID Frequency
- SSL encryption in transit
- SQL Express 2012 or above

Terminals

KTA Terminal

- Dimensions (WxHxD): 125 x 225 x 45 mm
- Display: 4 x 20 chars, illuminated
- Protection Class: IP54

KTA Touch

- Dimensions (WxHxD): 145 x 230 x 92 mm
- Display: 5.7" color, 480 x 640
- Protection Class: IP54

All systems come with a 1-year warranty on hardware and software. RealCare Service Plans are available covering on-call support, software updates, and hardware.
