Secure storage and smart management for gear, equipment and weapons in law enforcement

The AssetTracer smart locker solution offers secure storage cabinets with automated auditing and reporting.

Control who can access each item in the locker, restrict when they can be taken, automate weight checks for pepper spray auditing and regulations and ensure that equipment is fully charged before it can be taken.

Our electronic storage system allows you to manage access to firearms and police gear efficiently, while ensuring accountability.

- Efficient and secure gun pool management
- Integrated with major access control systems
- Automated asset tracking and weight checks for OC spray cans
- Secure storage for cameras, phones, laptops, and
- Weapon lockers, long gun lockers, Taser storage
- Store, track, and charge multiple items per compartment to save space

Police Locker
Features & Benefits

- A range of compartment sizes, charging options, and optional asset tagging makes our solution adaptable to secure, manage and track any type of asset.

- Modular framework allows to combine different compartment sizes in a single locker system.

- Heavy duty metal lockers made of 18-gauge steel, with a choice of solid, vented or clear doors.

Laptop Locker

- Methods of authentication: PIN, Prox cards, biometric readers, and smart phones.

- Emergency opening feature.

- Optimized for daily use and designed for rugged operational settings.

- API and Integration with most major access control systems.

Gear Bag Locker

- Users can report damaged or faulty equipment upon return resulting in removing item from circulation and/or triggering a service ticket
- Role-based access control allows items to be assigned by user and time frame.
- Asset tracking with content surveillance allows each asset to be individually identified and tracked.

- Optional power charging in each compartment.
- Eliminate downtime wasted on locating items and manual administration time.
- Compliance reporting, audit reports and event reports drive data insights into operational efficiency

Weapon Locker
